

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Please cancel claims 20 and 21 without prejudice.

Listing of Claims:

1. (Previously Presented) The digital projector of claim 9, wherein the digital projector is configured to mount to a ceiling, and wherein the digital projector is configured so that the panel is accessible when the digital projector is mounted to the ceiling.
2. (Cancelled)
3. (Cancelled)
4. (Original) The digital projector of claim 1, where the panel is openable by depressing a latch actuator.
5. (Cancelled)
6. (Previously Presented) The digital projector of claim 9, where the digital projector is configured so that the projector component is only removable when the panel is open.
7. (Previously Presented) The digital projector of claim 9, where the panel additionally provides access to a projector component that includes a lamp module.
8. (Cancelled)

9. (Previously Presented) A digital projector, comprising:
a projector housing; and
a manually openable panel that provides access to the interior of the projector housing, where the panel remains connected to the projector housing while open;
where the panel provides access to a projector component that is a control panel module, and where a control panel, included with the control panel module, is accessible when the panel is closed.
10. (Previously Presented) The digital projector of claim 9, where the panel provides access to service information when open.
11. (Previously Presented) The digital projector of claim 10, where the service information includes an identification of a projector service provider.
12. (Previously Presented) The digital projector of claim 10, where the panel provides access to a business card display device.
13. (Previously Presented) The digital projector of claim 9, further comprising a safety interlock configured to interact with the panel.
14. (Original) The digital projector of claim 13, where the safety interlock is configured to disable at least one projector component when the panel is open.
15. (Original) The digital projector of claim 13, where the safety interlock is configured to prevent the panel from opening while a hazardous condition exists within the projector housing.
16. (Cancelled)
17. (Canceled)
